

I am **passionate** about helping people. As a clinical dietitian, I **thrived on the daily, collaborative efforts** to improve patients' lives. I also saw first-hand the impact that various paper and electronic medical records system had on delivering efficient, quality patient care.

The opportunity to **design systems that allow clinicians to concentrate on their interactions with their patients, and not their software**, is what pulled me into the field of UX.

As a UX designer, my goal is to design systems that allow users to concentrate on the work they are passionate about, and **my jam is when I see a user go about their work without noticing mine.**

The future is here, it's just not evenly distributed.

~William Gibson

KATIE'S PORTFOLIO DEADLINES

- 8/7: finish about me slide
- 8/14: finish tools slides
- 8/21: decide on projects
- 8/24: DUE; PORTFOLIO WORKSHOP-polish and fill in table of contents

~This Person*

About Me

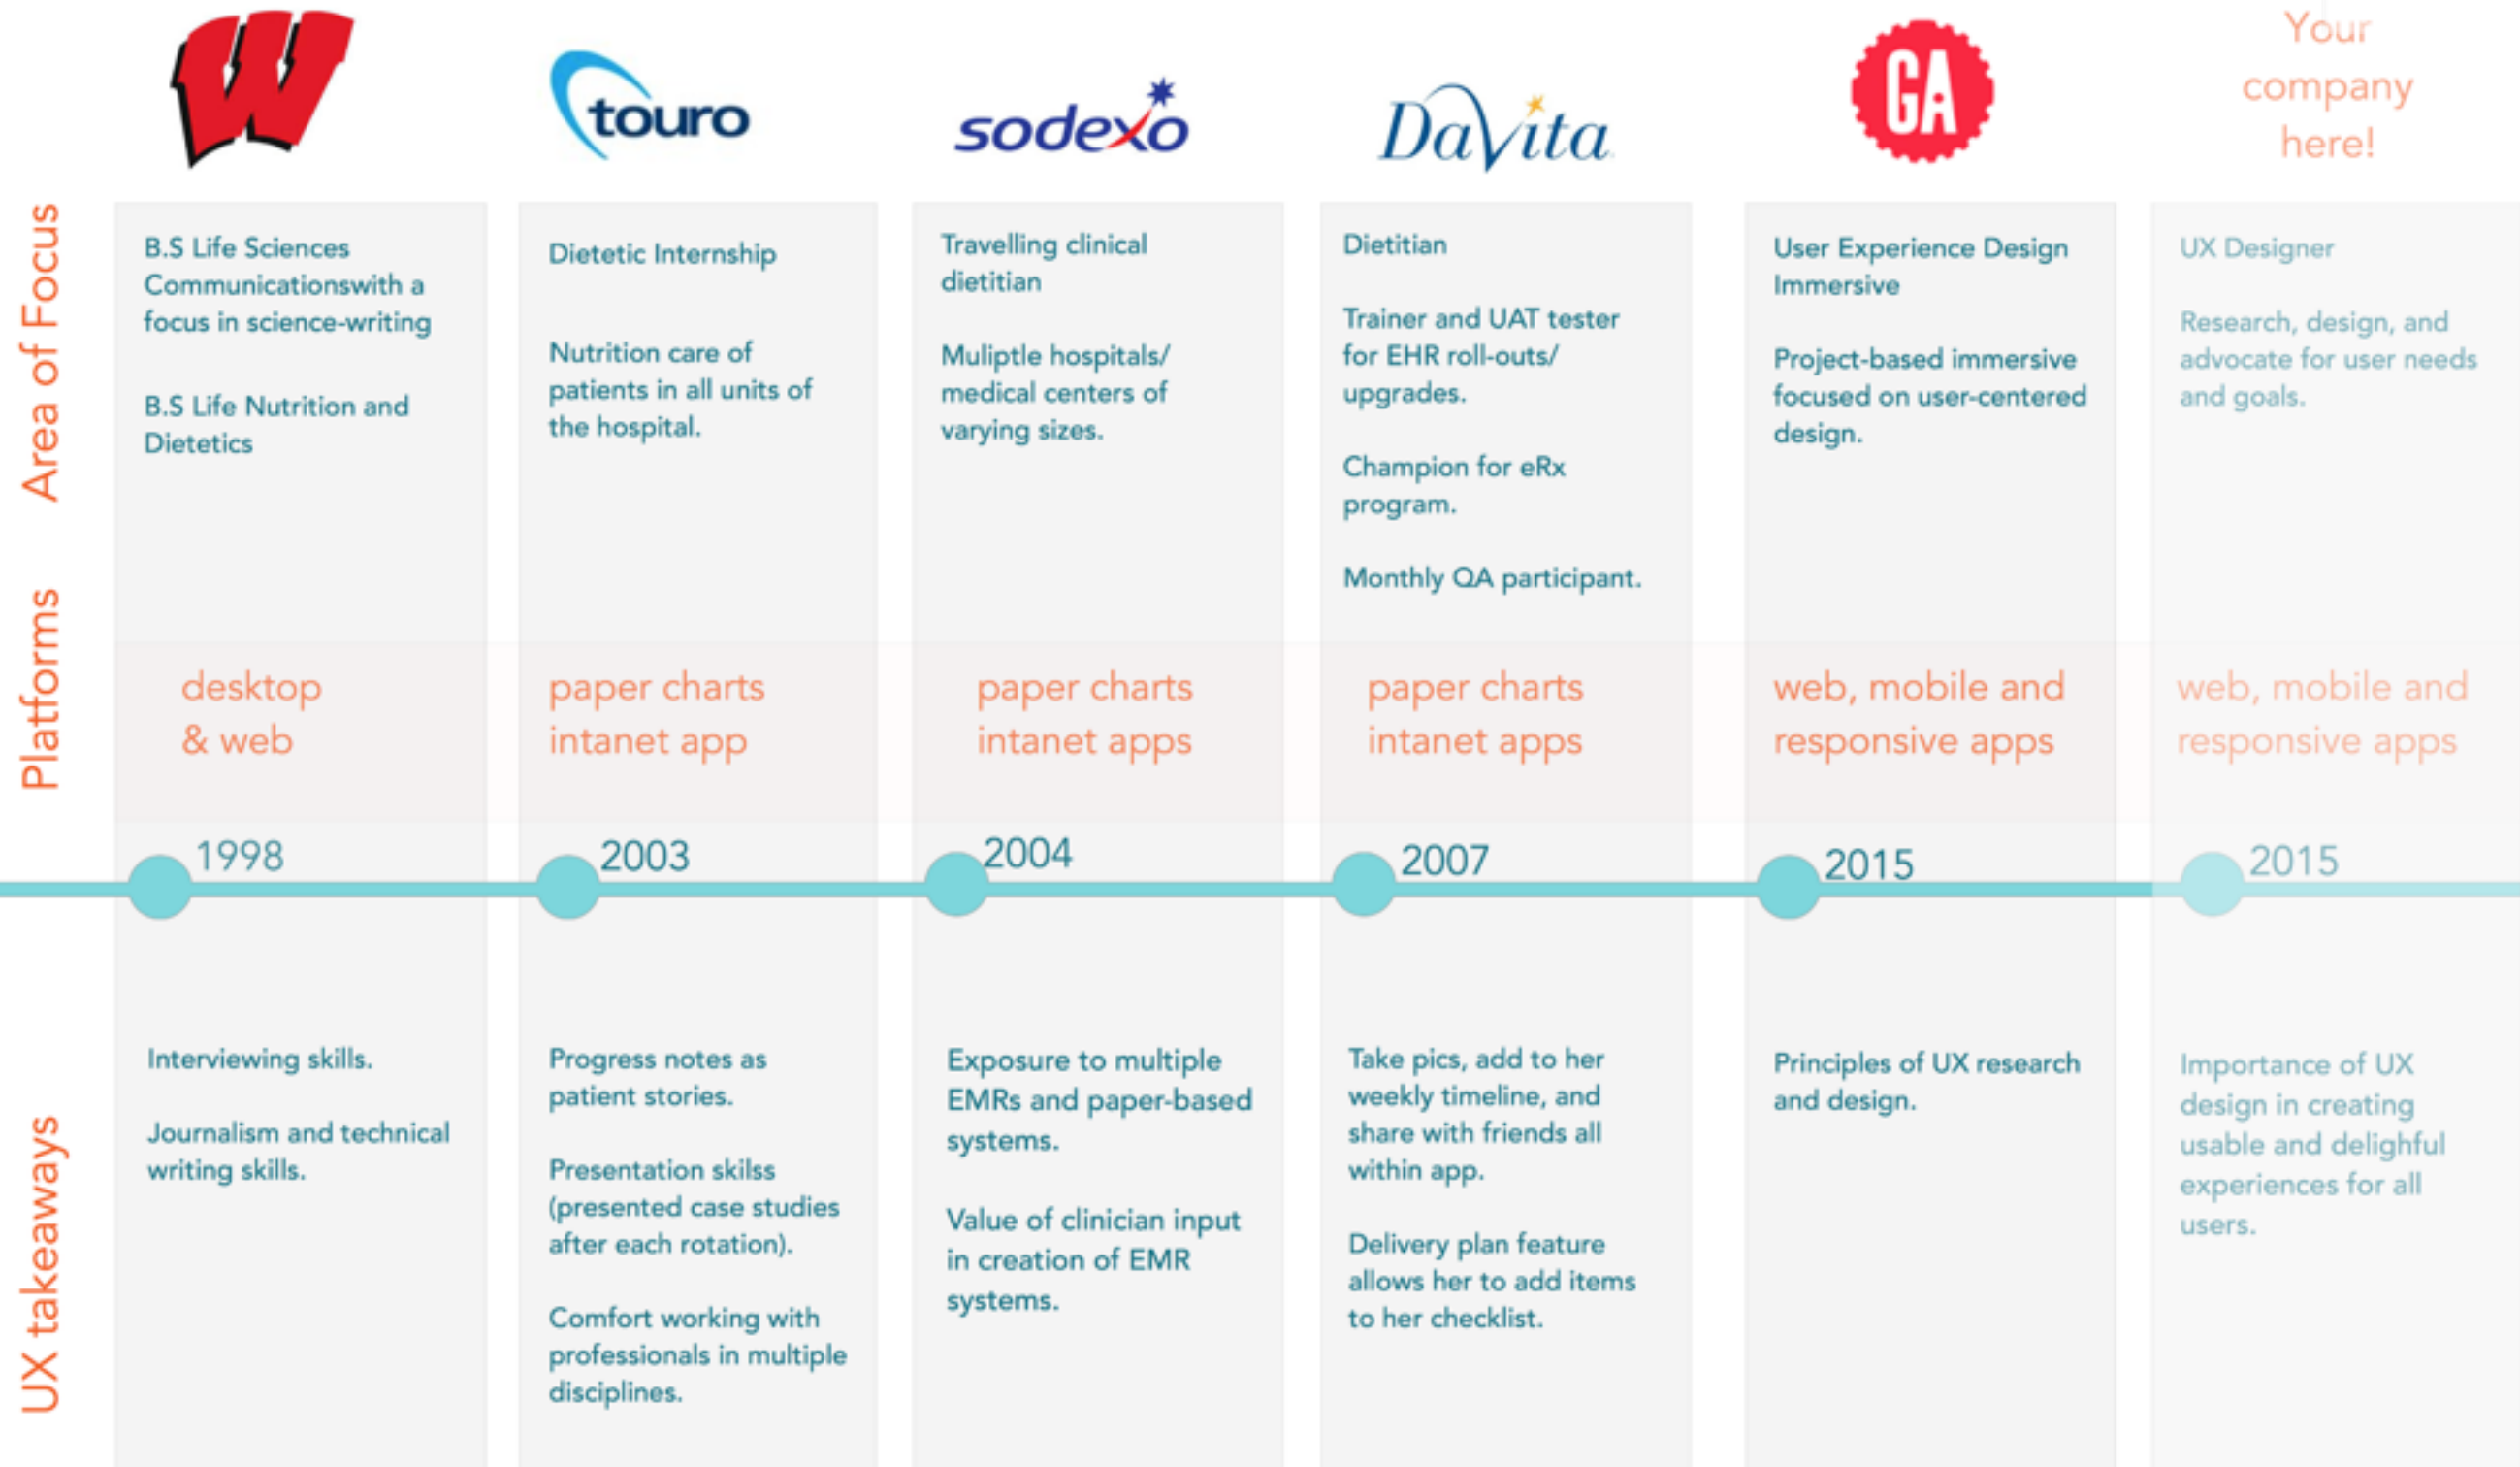

I'm inspired by people who dedicate their time to helping others. I believe that technology should enable people to do the work they love, not distract them from it. I dream of designing tools that help people who help people, and my absolute design joy is watching someone do their work without noticing mine.

The future is here, it's just not evenly distributed.

~William Gibson

My Journey

Tools

- onmigraffle
- sketch
- axure
- keynote
- trello
- do we list all software we know how to use?

Projects

- I still don't understand if we are supposed to include one project or multiple projects.
